Hi All,

Joined: Fri Oct 14,

I am trying to run the "ReadCineFileImage" function that came with the Phantom SDK for MATLAB package. But I am getting the following error:

Error using calllib  
Library was not found

Error in PhNewCineFromFile (line 4)  
[HRES, dummyAll] = calllib('phfile','PhNewCineFromFile', fileName, pCH);

So I am suspect that I did not install the package correctly. I did follow the instructions listed in the 'Phantom SDK for Matlab.pdf'. One question is the phantom dlls mentioned in the instructions are the dlls in the Phantom directory in the C:\Program Files right? I have Windows 7 and my Phantom control software version is 9.3.692.0. Could someone please give me some help on this?

Thanks in advance,

Lynniz

VRi Employee

Please pay attention to "4.4.2.3. Function usage." and "3. Installation". You should have used function "LoadPhantomLibraries()". You must have the dll's in the Matlab search path.
